# Wie sieht aktuell die Jobsuche in 2020 websites?

Warum gerade in 2020 ein neues Plattform  
für Jobsuchende entwickeln?

Tell me do you really think that people will spent time on going trough so many pages?

**Wir haben 1884 passende Jobs für Sie gefunden:**

Ihre Jobsuche Java ergab 5.111 Stellenanzeigen

**Java Jobs (33876 Jobs Found)**

Seite 1 von 25.208 Jobs 

!!!!How i think to solve the  
problem!!!!

Solution is simple!

!!!!Prototyp!!!!

Ein Konzept für das  
Vorhaben!

# PROJECT GOALS!

- Increase the job seeker efficiency !
- Create many small distributed job seeking platforms with idea of job seeker as main user of such system!
- Help job seeker to organise his or her job applications in more efficient way, encourage job seeker for more!
- At some point provide API for company's which can directly communicate to job seeker webservice endpoint
- Help job seeker don't loose scope on own job seeking activity!
- One platform to rule them all ;-)

**javaprofi@gmx.de**

**www.javaprofide.de**

**Google Play store: <https://bit.ly/2wAJW1u>**

# PROJECT STATE

- Developing on Angular ( most popular framework in Germany based on real data )
- This is OpenSource project, licensed as LGPL  
<https://www.gnu.org/licenses/lgpl-3.0.html>
- First alpha will be hosted by SUSE <https://www.explore.suse.dev/>
- Developers who can help (which can write code in TDD style in Angular ) always welcome!
- Financial support welcome (if you plan to use this platform in your company)
- Extend and improve , gathering analytics, bots , more granular search ,
- Communicate with job portals gathering data from public api's.
